

## Revanth

Web Developer | Full Stack Developer

Chennai, Tamil Nadu | 8883388393 | [revanthleonardo@gmail.com](mailto:revanthleonardo@gmail.com) |

[<https://github.com/Revanthleonardo>]

Passionate about building high-impact web applications with modern tools and AI.

## Professional Summary

Prolific **Full Stack Web Developer** with a strong passion for metrics-driven development and process automation. Expertise in end-to-end web application development using HTML, CSS, JavaScript, SQL, and AI-powered coding tools (including Grok).

Transformed Sunshine Education Academy's operations through custom web solutions, increasing revenue for the Arithmetic Olympiad project by **50%** and reducing certificate printing costs by **30%**. Currently driving SEO/SEM initiatives and building automation tools at Besttech.in. Seeking opportunities to create world-class, scalable web applications.

## Technical Skills

- **Frontend:** HTML5, CSS3, JavaScript
- **Backend/Database:** PHP, MySQL
- **Tools & Technologies:** AI-assisted development (Grok and other LLMs), UiPath automation, SEO/SEM modules

## Professional Experience

**Web Developer / Full Stack Developer**

**Besttech.in**, Chennai (Remote / Hybrid)

*March 2021 – Present*

- Developed and automated a **UI Path Checker** tool that monitors Domain Authority (DA), Page Authority (PA), and Spam Score — significantly improving SEO efficiency and decision-making.
- Led the design and implementation of **SEO/SEM modules** for multiple web pages, contributing to better search visibility and performance tracking.
- Built full-stack web applications using HTML, CSS, JavaScript, and SQL, enhanced with AI tools for faster development and higher code quality.
- Acted as a reliable outsourcing partner, delivering high-quality digital solutions that support business growth.

## **Full Stack Web Developer**

**Sunshine Education Academy**, Anna Nagar, Chennai

*September 2018 – August 2020*

- Designed and developed end-to-end web applications, transforming the academy from traditional to fully digital operations.
- Created a **Dynamic Reports system** and **Customized Bulk Certificate Creator** web app for the Arithmetic Olympiad project, resulting in:
  - **50% increase** in project revenue.
  - **30% reduction** in certificate printing costs through automation.
- Managed complete web development lifecycle — from requirements gathering to deployment and maintenance.

## **Junior Scientist Trainee**

**Tekwizard**, Gunidy, Chennai

*July 2017 – August 2018*

- Trained **50+ students** at Gateway International School, Padur in electronics and programming.
- Taught building of electronic circuits (Radio, Line Follower, Obstacle Avoider) and integration with Arduino sensors.
- Gained strong foundation in hardware-software integration and problem-solving.

## **Side Project**

**withrevs** (Founder & Content Strategist)

*December 2025 – Present*

- Founded **withrevs** – a short-form video service delivering high-engagement Instagram Reels and YouTube Shorts that drive real revenue for local brands and small businesses.
- Provide end-to-end solutions: content strategy, scripting, professional editing, captioning, and performance analytics using AI tools for maximum impact.
- Built supporting web applications and automation workflows to streamline client content production, scheduling, and ROI tracking.
